18.

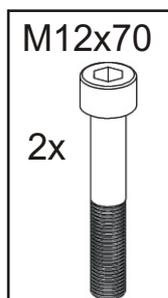

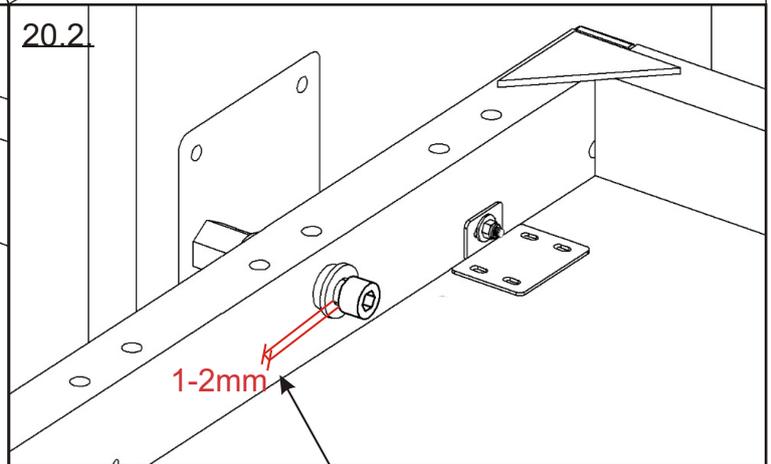

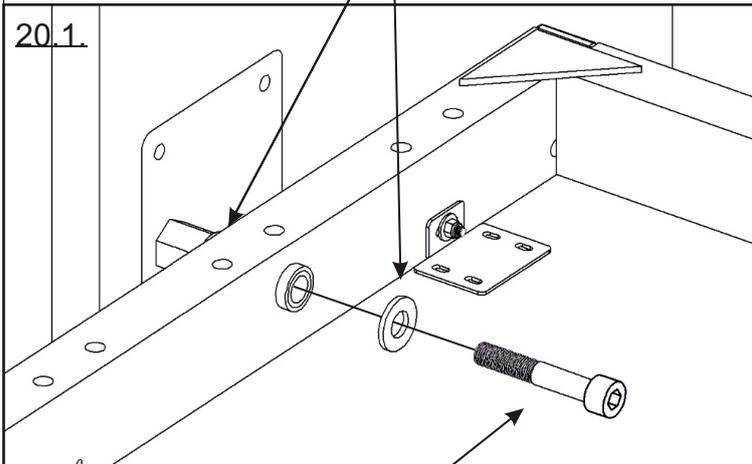

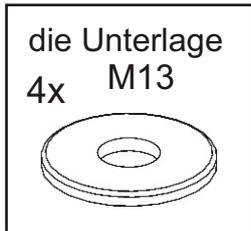

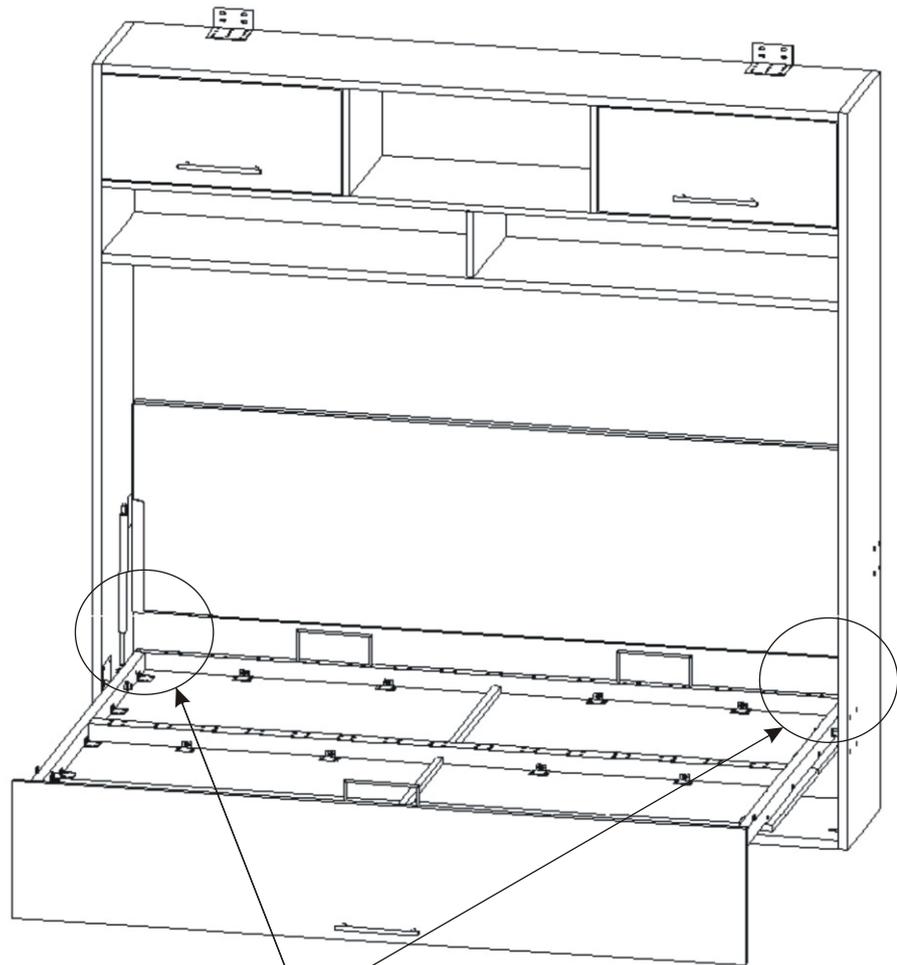

Der große Kolben ist am Rahmen zu montieren und mit einer Mutter zu sichern. Die Mutter darf nicht vollständig angezogen werden, um die notwendige Beweglichkeit des Kolbens zu gewährleisten. Bei unsachgemäßer Fixierung besteht die Gefahr einer irreversiblen Beschädigung des Kolbens.

20.

1. Schieben Sie den Rahmen mit einem Kollegen in den Korpus.
2. Schrauben Sie den Bettrahmen mit einer M12x70-Schraube und einer Unterlegscheibe an die Bodenplatte des Bettkörpers an.

Ziehen Sie die Schraube M12 × 70 nicht vollständig fest. Lassen Sie zwischen Schraubenkopf und Unterlegscheibe ein Spiel von ca. 1–2 mm, um die notwendige Beweglichkeit zu gewährleisten. Wird die Schraube zu fest angezogen, besteht die Gefahr einer irreparablen Beschädigung des Bettrahmens!

21.

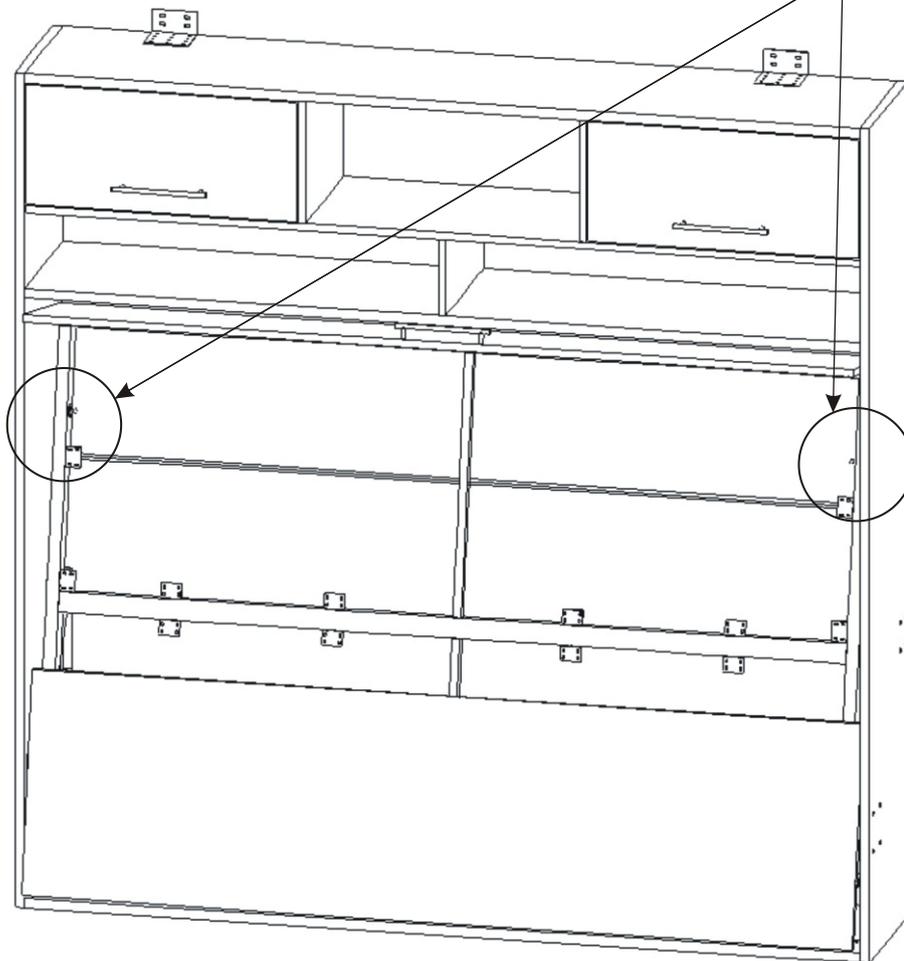

Die Kolben werden bei geschlossener Tür montiert.
Die obere Anschlagstange darf nicht montiert werden.
1_50x70x25mm.

- 1) Die Türen in die horizontale Position kippen und den gesamten beweglichen Teil nach innen drücken.
- 2) Nun die Kolben lose in die oberen Bolzen einsetzen.

Die Schraube darf nicht vollständig festgezogen werden, da sie ein geringes Spiel für die Drehbewegung haben muss. Andernfalls besteht die Gefahr einer irreparablen Beschädigung des Kolbens!

Die Einstellung des Abstands der Kolben

Zur Montage des Klappbettes verwenden Sie die Kolben, die als in der Abbildung A eingestellt sind. Wenn sich die Tür mit der Matratze nicht übereinstimmt, stellen Sie den Kolbenabstand ein, in dem Sie ihn leicht um ca. 1 bis 2mm öffnen. Maximal 2mm!!! Wenn Sie einen größeren Abstand einstellen, werden die Kolben dauerhaft beschädigt. Dieser Schaden werden von der Reklamation abgedeckt.
